

## Participation fee

### Raw space

Min. 18 sqm	One open side	USD 308 / sqm
	Two open sides	USD 325 / sqm
	Three open sides	USD 341 / sqm
	Four open sides	USD 358 / sqm

### Shell scheme

Min. 9 sqm	One open side	USD 352 / sqm
	Two open sides	USD 369 / sqm
	Three open sides	USD 385 / sqm
	Four open sides	USD 402 / sqm

## Exhibition advantage

- Professional buyers from Asia
- Platform to provide the most original technologies
- Most complete products and solutions from home to buildings

## 2018 Show figures

- 19,907 visitors from 65 countries
- 52% international visitors were new buyers
- 90% of visitors are key decision makers in C-level, director and manager positions
- 53% of visitors are in the purchasing role for their companies

## Exhibitors

427 Companies from 19 countries

# Smart Building with Internet of Things Solutions

Asia's 1<sup>st</sup> Platform to Provide  
AI and IoT Solutions for Smart Buildings

8 – 10 May, 2019 | Nangang Exhibition Center, Taipei, Taiwan

# From Smart Home to Smart Building with IoT

In 2019, SMAhome will evolve into Asia's first event for the "Smart Building Internet of Things" (SMABIoT) market segment. The new event will focus on the Internet of Things (IoT) and artificial intelligence solutions that will enable a true IoT environment for buildings.

## Core application focus

The application focus will be placed on commercial, residential, healthcare and hospitality with the emphasis on implementing AI and IoT into these settings.

## Exploring technologies

Exploring the latest and most complete AI application topics, facial recognition, voice command, deep learning and more cross-disciplinary applications.

## Integration for business opportunities

The chance to gain knowledge from hardware manufacturing to software innovation, exploring new modes of cooperation and connecting smart life value chains.

## Focus on four major architectural applications

## Asia BloT Innovation Forum

The seminar will explore how to bring innovative applications to smart building solutions through new technologies (AI, transmission) plus integration (software platforms) and new business opportunities in commercial buildings. The three-day seminar aims to bring together industry professionals from all over Asia.

- **Smart Living:** Applying new application of smart building to the Asia-Pacific industry value chain to help smart developments.
- **Smart BloT Solutions:** Exploring new elements of IoT, BigData, and AI building applications, as well as ways to open up new business opportunities by combining operators with cross-border integration.
- **Transmission Academy:** LoRa, NB-IoT, Bluetooth Mesh, Z-Wave, WiFi and other wireless transmissions in smart building networking applications.

## Target Buyers

### Smart city

- Thailand Digital Economy Promotion Agency (DEPA)
- Thailand Eastern Economic Corridor Office
- Thailand Smart City Alliance
- Thai IoT Association

### Real estate

- Thailand Housing Business Association
- Thai Condominium Association
- Vietnam HoREA
- Cambodia Constructors Association (CCA)

### Telecommunication

- Vietnam Viettel, VinaPhone, MobiFone, Vietnamobile, Gmobile, S-Phone
- Philippines Chamber of Telecommunication Operators

### Hospitality

- Hotel Security Association Thailand
- Philippines Hotel & Restaurant Association

### Electrical engineering

- Thailand Embedded Systems Association
- Thai Electrical & Mechanical Contractors Association
- Cambodia Board of Engineers

### Top 10 visiting countries

- |                 |                           |
|-----------------|---------------------------|
| • Japan         | • Singapore               |
| • Thailand      | • China (incl. Hong Kong) |
| • Philippines   | • Malaysia                |
| • United States | • Vietnam                 |
| • Korea         | • Indonesia               |

## BloT Platform

**IoT Technology:**  
Artificial intelligence, cloud platform, transmission, BigData

**System intelligence upgrade:**  
Security systems, fire alarm systems, air conditioning, environmental control systems, building automation, public address systems, energy systems, communication systems

**Application and management:**  
Property management, healthcare, community safety, emergency rescue, life service, parking management, smart energy saving

## Smart Solution Center

### Highlights:

- |                                      |                                      |   |
|--------------------------------------|--------------------------------------|---|
| • Scenario demo                      | • Voice command                      | • AI by facial recognition for better security and loyalty programs |
| • Google / Amazon / Apple Ecosystems | • Robotics and the possible services |   |

### Smart community & home

- Smart community integration platform
- Smart community service management platform
- AI image recognition integrated access control application
- Bluetooth mesh and LoRa transmission technology

### Elderly care

- Home care system
- Health management system
- Emergency call system
- Breathing monitoring system
- Service robots
- AI image recognition: drop prevention system

### Smart hotel

- Smart lock
- Environmental control system
- Energy management system
- Service robots
- AI image recognition: access control check-in
